Experience

Data Products Division
Analytix GmbH

Senior Product Manager 01/2022 – Present

Owning the product vision and roadmap for the company's flagship analytics platform serving 3,000+ enterprise clients.

- Grew **Monthly Active Users by 65%** through a redesigned onboarding flow
- Launched self-service dashboarding feature, reducing support tickets by **40%**
- Managed a cross-functional squad of 12 (engineering, design, data science)
- Defined and tracked KPIs across acquisition, activation, retention, and revenue

Product Manager 06/2019 – 12/2021

Led the development of the real-time alerting module from concept to general availability.

- Conducted **80+ customer interviews** to validate problem space
- Shipped MVP in 3 months, reaching **$2M ARR** within the first year
- Introduced experimentation framework with weekly A/B test cadence

Strategy & Analytics
GlobalRetail SE

Lead Data Analyst 03/2016 – 05/2019

Built the central analytics function for a retail group with 500+ stores across Europe.

- Designed demand forecasting models reducing overstock by **18%**
- Created executive dashboards adopted by C-suite for quarterly planning
- Led a team of 4 analysts across pricing, supply chain, and marketing

Data Analyst 09/2014 – 02/2016

First analytics hire, establishing data practices from the ground up.

- Built the company's first data warehouse on **AWS Redshift**
- Automated 30+ manual Excel reports into scheduled SQL pipelines
- Trained 15 business users on self-service BI tools

Education

Technical University of Munich

Ph.D. in Applied Statistics 2010 – 2014

Dissertation: *Bayesian methods for dynamic pricing in multi-channel retail environments*

- Published 4 papers in peer-reviewed journals
- Teaching assistant for graduate-level statistics courses

Moscow State University

M.Sc. Mathematics (Distinction) 2006 – 2010

Specialization in probability theory and stochastic processes.

Key Projects

Customer 360 Platform

Product Owner 2023

Enterprise customer data platform unifying data from 12 source systems.

- Integrated CRM, billing, support, and product usage data into a single view
- Enabled sales team to increase **upsell conversion by 25%**
- Delivered under budget and 2 weeks ahead of schedule

Pricing Intelligence Engine

Project Lead 2022

Machine learning system for dynamic pricing across 50,000+ SKUs.

- Built competitive price scraping pipeline processing **2M data points/day**
- Pricing recommendations increased gross margin by **3.2 percentage points**
- Integrated with ERP system for automated price updates

Churn Prediction & Prevention

Data Science Lead 2020 – 2021

Predictive model identifying at-risk customers 90 days before churn.

- Achieved **AUC of 0.91** on the production model
- Triggered automated retention campaigns saving **$4.5M annually**
- Reduced churn rate from 12% to 8.5% over 18 months

Publications

Journal Articles
